

### **1. BreastScreen Midland (BSM) – new GP co-ordinator**

BSM are sorry to lose GP co-ordinator, Sandy Wright, but delighted that Robyn Jackson (currently known to many of you as the voice at the end of the National Immunisation Register phone) will take up this role on 11 August. Robyn is the face of BSM to you in general practice. She will be spending time in different practices to learn how things work from the GP perspective so she can be as supportive as possible in assisting you to enrol women into the breast screening programme.

### **2. Antenatal HIV screening programme – translated booklets available**

The Antenatal HIV screening programme has now been running in the Waikato DHB for 2 ½ years. We have now had 20,541 antenatal HIV tests performed. It remains important that every pregnant woman is made aware that an HIV test is routinely offered as part of the antenatal blood testing. This information sharing at the time of testing is a vital component of informed consent (which is a legal requirement in New Zealand).

There are some new resources available from the NSU website [www.nsu.govt.nz](http://www.nsu.govt.nz)

The booklet 'HIV testing in pregnancy' has been translated into:

- Tongan
- Maori
- Samoan
- Hindi
- Swahili
- Korean
- Traditional Chinese
- Simplified Chinese

You can download the booklet from the NSU website or contact Caroline if you require copies. Thank you for your ongoing support of this programme.

Caroline Wharry,  
HIV Clinical Nurse Specialist  
Waikato Hospital

Ph 07 839 8899 ext 23040

### **3. Update on the Service and Campus Redevelopment project**

#### **Waikato Hospital**

Since opening in February, use of the carpark building and Transit Lounge continues to increase with both demonstrating their value through the busy times and bad weather.

Work is well underway on the new emergency department, sterile services unit and acute hub. This is expected to be completed August 2009.

The first half of the refurbished delivery suite opened in July. Each birthing room has its own ensuite facilities and the rooms are more modern and brighter with each receiving natural sunlight. At end-state this first half will be the Women's Assessment Unit (temporarily established across the corridor) so rooms have been primarily designed for that purpose but have the ability to be used as birthing rooms too. Work is now underway on the remaining half to bring it up to the same standard by the end of the year.

The Selwyn St entry/exit will re-open for staff, emergency vehicles and buses by the end of September. Patients and visitors will continue to use Gate 1 off Pembroke St.

#### **Thames Hospital**

Construction of the Thames Clinical Centre is complete and the centre will be fully functional by the end of October for outpatient clinics, radiology and the emergency department.

Work on the Inpatient Unit also continues for completion in December. The unit will house the hospital wards and a high acuity unit.

For more information about the project visit [www.waikatodhb.govt.nz/SCR](http://www.waikatodhb.govt.nz/SCR).

Clinic	Category	Waiting Time
Audiology	Children 9-32 mths	4 months
	Under 17 years	4 months
